Reactivate Current Leads With WooSender

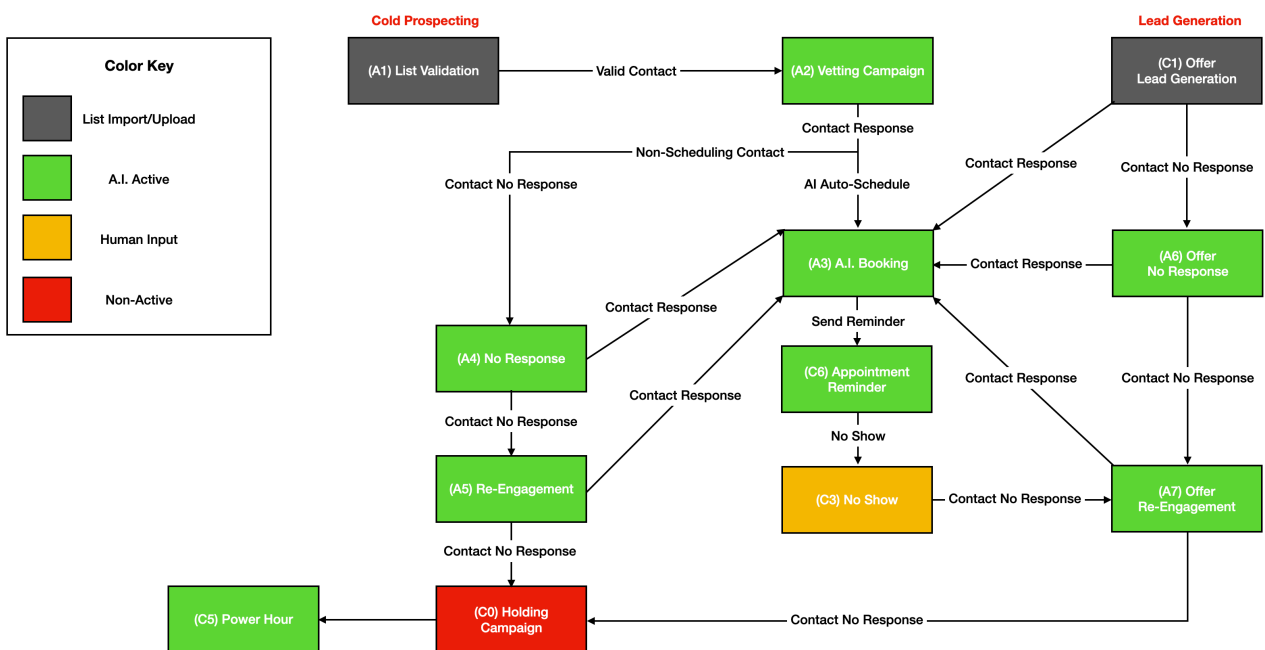

WooSender A.I. helps you start, converse, and book more appointments on autopilot for your Solar Company so that you can drive more opportunities and installs!

We start with an intake assessment to understand your solar company's unique voice and value.

From there our team creates all the scripts and messaging for your A.I. appointment setter allowing it to take over your pipeline and maximize your opportunities.

We then setup a launch call, and by following our simple daily workflow you'll have your phone ringing with NEW opportunities.

WooSender Solar Loop:

WooSender Solar Case Study

Problem

Solar Company was currently using Salesforce and Marketing Cloud to nurture their inbound form leads with only 40% of leads turning into a phone call. They were looking for a solution to effectively engage old leads.

Solution

To help effectively engage old leads, they implemented a Solar Loop inside of WooSender.

Result

After a 90-day test pilot of using WooSender the client saw:

- Their response rate increase to 85%
- Their schedule rate increase to 65%
- Resulting in 190 Installs
